**DETAILED ACTION**

***Response to Amendment***

1 Applicant amendment overcomes §102(b) rejection of claims 1-20 and the rejection is withdrawn.

***Allowable Subject Matter***

2 Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites, in part, "the plurality of different test conditions being defined by values of said second attributes and sampled values of said first attributes, said JCFG being operable to automatically sample a set of all possible values of said first attributes to obtain said sampled values, said sampled values including substantially fewer values than said set of all possible values". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 2-15 depend from claim 1.

Claim 16 recites, in part, "obtaining attributes of the changed computing environment, said attributes including first attributes of said changed computing environment which have not changed from the first computing environment, and second attributes which represent change from the first computing environment; automatically sampling a set of all possible values of said first attributes, said sampled values including substantially fewer values than said set of all possible values". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 17-19 depend from claim 16.

Art Unit: 2863

Claim 20 recites, in part, "obtaining attributes of the changed computing environment, said attributes including first attributes of said changed computing environment which have not changed from the first computing environment, and second attributes which represent change from the first computing environment; automatically sampling a set of all possible values of said first attributes to obtain sampled values of said first attributes based on, said sampled values including substantially fewer values than said set of all possible values". This feature in combination with the remaining claimed structure avoids the prior art of record:

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
